Care Instructions Philodendron Silver Sword

Philodendron hastatum Silver sword has a lovely silver, almost metallic-looking foliage.

Philodendrons are known for their easy care and ability to adapt to the indoor conditions. This vining Philodendron native to the South American rainforest has a sturdy stem which supports an upright growth habit.

A stake or moss pole is recommended to maintain it's form. As the Silver sword grows and develops the size of its leaves will increase and become triangular in shape.

Light: Moderate to bright indirect light. Preferring a warm, humid environment, however very adaptable to cooler conditions.

Water: Allow soil to dry out before watering. Ensure good drainage and do not let pot to sit in water.

Maintenance. Ready potted in premium soil, no need to repot for 12-24 months. Fertilise with our GT Foliage Focus Liquid Plant Food monthly during spring/ summer.

*May cause irritation if ingested. Keep out of reach from children and pets.
