Care Instructions

Epipremnum Aureum Neon Pothos

Epipremnum Aureum Neon Pothos is one of the most popular and eye-catching varieties of Pothos. They are low-fuss houseplants that are sure to brighten up any corner of your home.

Native to the tropical Solomon Islands, this stunning variety of Pothos is characterised by neon green, heart-shaped leaves and a vining growth habit. The best part is, neon pothos are easy to care for—making them great for beginners or a stunning addition for any plant enthusiast.

Light: Enjoys bright indirect sun light. They are very happy under florescent lighting making it an excellent office or houseplant.

Water: Allow soil to dry out before watering and do not let pot to sit in water. It does not like to be overwatered so err on the side of caution when it comes to watering.

Maintenance. Ready potted in our Foliage Studio premium potting soil, no need to repot for 12-24 months. Fertilise twice in the summer months with our GT Foliage Focus Plant Food and will not require any further fertiliser for the rest of the year.

*toxic if consumed in copious amounts. Keep out of reach from small children and pets.
