Care Instructions **Alocasia Melo**

A rare collector's dream

– sculptural foliage with a prehistoric vibe.

Bring bold texture and unique tropical charm into your space with the Alocasia Melo, a highly sought-after variety known for its thick, rugged leaves that look almost stone-like in appearance. This striking aroid features deep green foliage with dramatic veins and a quilted surface that gives it an architectural, almost alien aesthetic.

Native to the rainforests of Borneo, Alocasia Melo thrives in warm, humid environments and makes a stunning statement in any indoor plant collection. Though compact in size, its deeply textured leaves make it look like a living sculpture – perfect for minimalist, modern, or jungle-inspired decor.

Light: Bright indirect light. Can tolerate lower light conditions. Enjoys humidity. Direct sun and cold draughts will brown the leaves.

Water: Water when the top layer of soil is dry. Do not allow plant to sit in water.

Maintenance: Ready potted in our premium soil, so no need to repot for the next 12-24 months. Fertilise with our GrowthTechnology Foliage Focus Plant Food monthly during spring/ summer.

Toxic: Keep out of reach from pets and children.
