Care Instructions Begonia Hot Spot

Introduce bold elegance into your indoor space with the Begonia 'Hot Spot'. This striking cultivar features deep green, pointed leaves dotted with silvery-white spots, contrasted by a rich red underside, creating an eye-catching foliage display. This Begonia Hot Spot will add a splash of dramatic foliage colour and texture, perfect for modern interiors or darker corners that need a visual lift. It is low maintenance compared to other varieties, and thrives on consistent conditions rather than frequent trimming or grooming.

Light: Bright indirect light. Avoid direct sun and dry or cold draughts which will brown the leaves. Thrives in higher humidity and warm indoor temperatures.

Water: Keep soil moist but not soggy, do not allow plant to sit in water. Tip: Allow the top layer of soil to dry out between watering.

Maintenance: Ready potted in our premium soil, so no need to repot for the next 12-24 months. Fertilise with our GrowthTechnology Complete or Foliage Focus Plant Food monthly during spring/ summer.

Air-purifying plant

Toxic: Keep out of reach from pets and children.
